Work Experience

MMF Infotech Technologies Pvt Ltd | React.Js Developer **Feb'23 - Present**
Link: https://www.mmfinfotech.com/

- **Frontend Development** : Designed and developed dynamic, responsive user interfaces using React.js, significantly improving, implementing user interface experience and engagement. Implemented best practices in state management and component architecture, resulting in streamlined code maintenance and faster feature rollouts.

- **Quality Assurance**: Partnered closely with QA engineers throughout the development lifecycle to ensure the delivery of high-quality, bug-free software. Proactively addressed potential issues, conducted thorough testing, and consistently met or exceeded client expectations for product reliability and performance..

Projects

Project: Casino-web
Link: https://casinosolitaire1-10.com/

- **Description**: Developed a captivating and responsive web-based casino game using industry-standard technologies like React.js and Redux
- **Frontend Development**: Focused on crafting a user-friendly and visually appealing interface that seamlessly adapts across various devices (desktop, tablet, mobile) using HTML, CSS (including Bootstrap), and JavaScript.
- **Responsive Design**: Implemented a responsive layout with fixed sections to ensure an optimal user experience for all screen sizes, enhancing accessibility and user engagement.

Project: Interactive Portfolio Website
Link: https://casinosolitaire1-10.com/

- **Description**: Developed a fully responsive and interactive portfolio website using React.js to showcase my skills and experience..
- **Frontend Development**: Utilized React.js for building a dynamic and component-based user interface, ensuring efficient code management and maintainability.
- **Interactive Features**: Implemented engaging functionalities using JavaScript to enhance user experience. This included email contact logic, potentially incorporating features like contact forms or animation triggers.
